

Car Park Management

Our wheel clamping service has proved to be the most effective deterrent and cost effective solution, to eliminate unauthorised parking both on and off street. With more and more vehicles on the roads than ever before and a poor public transport system if you provide parking for staff, customers, visitors etc, it has become a burden beyond belief. We at Sentry Security will relieve those pressures simply, professionally and cost effectively, allowing you to concentrate on what you do best - your business.

Wheel clamping is a sensitive issue and our aim is to always ensure that the motorist is clearly informed of the parking restrictions by using large clear prominently located warning signs displaying the restrictions.

We strive to ensure the offenders are treated professionally and fairly, we have an Appeals & Complaints Procedure. We are also members of the Irish Parking Association.

How It Works

We arrange for one of our area managers to visit and survey your site, discuss requirements and identify your needs and decide upon the parking restrictions and number of warning signs required by law. We then arrange for our maintenance

division to erect large clear warning signs informing motorists of the restrictions in place, clearly stating in unambiguous terms the consequences of parking illegally. Where needed we issue your authorised vehicles with Parking Permits or we shall recognise your permits if you already have permit scheme in operation.

Our uniformed Parking Officers then patrol your site randomly but regularly in our sign written vans, should they identify an illegally parked vehicle they shall affix a wheel clamp and a sticker informing the motorists how to obtain release. (No reference is made to you, the site owner).

Of course should you identify an illegally parked vehicle between our patrols, you can call our computerised Control Room. They will locate the nearest mobile patrol using our live vehicle tracking GPRS system and ask them to attend ASAP.

Once our computerised Control Room receives a request from an offender it is radioed to the nearest patrol so to insure our patrols attends quickly. Upon payment the offender is given a full VAT receipt.

May we add that lone females, offenders with children and the elderly are given priority for release.
