

Key Holding & Alarm Response

Alarms without a response are just a noise!

Imagine this. It's a cold and dark winter morning, the rain beating against the bedroom window and the alarm at your business premises has just been activated.

What do you do?

With crime levels on the increase, can you afford to send out an untrained member of your staff to attend to the alarm. Do you really want to disturb your staff at home to deal with the activation? Will their safety be compromised? What will they encounter when they arrive at your premises? Has your staff received any formal training in Alarm Response?

The Answer?

Simply provide Sentry Security with the Keys and Alarm codes of your premises and as your principal Key-Holder, we will in turn dispatch a fully uniformed and trained Patrol Supervisor to investigate the cause of the alarm activation. Should it turn out to be a false alarm, we will check the building in full, reset the alarm and secure the premises. However, if necessary, our supervisors liaise with the Gardai,

emergency services and repair contractors. You and your staff will not be disturbed unless there is a more serious incident. Any incidents, which do occur, will be logged and a detailed report left for the client for the following working day.

The Benefits?

You can be sure that a fully trained patrol supervisor will be there to respond to any alarm activation at your premises. Sentry Security is in full contact with Gardai and emergency services.

By using the services of Sentry Security, you are eliminating any potential dangerous or worrying situations for your staff in responding to alarm activations.
