

Mobile Patrol Service

When you lock up each evening, your business premises is a potential target for a would be intruder. In instances where a customer does not feel the need to employ a static security officer but wishes to maintain the security of their premises, they may request our Mobile Patrol Service.

Sentry Security can provide a Quality, tailored service made to meet the needs of each of our valued clients. This Service can be provided at a very Competitive Price.

Our patrol supervisors are issued with the keys to our client's premises and we carry out an agreed number of inspections at random intervals through out the night and during the out of Business hours on weekends. Our Patrol Supervisors can perform external inspections or alternatively internal inspections of your premises as desired. Our team of fully trained Patrol Supervisors who are supplied with a clearly recognizable Sentry Security vehicle, which is equipped with full radio communication, carries out these visits.

Any incidents are logged during our Mobile Patrols and reports are then made available to our customers. Sentry Security can supply an automated reporting system which

gives the client a fully traceable history of the Patrol times and Inspections of your premises these reports are made available on a daily or weekly reporting format. All our patrol vehicles are equipped with GPS Tracing Systems and for health and safety reasons, all Patrol Supervisors are in constant contact with our 24 hour command and control centre to establish their whereabouts at all times.

Our fully trained Patrol Supervisors can check your premises during the vulnerable hours and deal with important Security issues such as;

- Setting and un-setting Alarms
- Checking windows and doors to ensure they are locked and secure
- Switching on and off lights and equipment
- Checking for any potential fire or water damage
